

## INFORMATION

**FRZ® Aloe Arborescens BIOLOGICAL** production, contains Vincristine in natural and pure state, due to the absence of additive preservatives which neutralize important active ingredients of this cytostatic and other precious components. It's mainly due Vincristine - chemically administered in chemotherapy at Oncology Hospitals - the many successes of **FRZ® BIOLOGICAL** in treating of various types of oncological diseases, especially leukemia, liver, prostate and breast.

If the patient is receiving chemotherapy, support better this uncomfortable treatment because the presence of the enzyme Glutathione Reductase in **Arborescens**. This antioxidant inhibits the formation of free radicals, helps eliminate heavy metals and chemicals, combat the illeffects of chemotherapy.

### Ingredients biological **FRZ® Aloe Arborescens**

#### A – Biological Aloe Arborescens (63%)

1. Vincristine (cytostatic)

6. Secondary Amino Acids: Aspartic and Glutamic Acid, Alanine and Arginine, Glycine and Cystine , Cystine and Glycine, Proline and Serine , Tyrosine
7. Enzymes most important: Glutathione Reductase, Brandiquinase , catalase , creatine phosphokinase , Proteolitiase , Fosfotase , Amylase and Nucleotidase .
8. Other substances known: Fatty Acids, Lignin, Saponins, Anthraquinones, Aloin, Isobarbaloin, Alloethic Acid, Aloe Emodin, Cinnamic Acid.

## B – Biological Honey (35%)

Honey has the ability to move in all parts of the body and is the vehicle that carries Aloe Arborescens to the far corners.

Simultaneously, tones the body with Fructose, Glucose, Sucrose, Maltose.

## C – Biological alcohol (2%) - alcoholic strength (0,71%)

This distillate allows dilate blood vessels - especially older people - and helps the action of Aloe Arborescens and Honey.

It also has a preservative function.

Special Care - For people with diabetes and alcohol is produced another ingredients of FRZ®

## Dosage and how to take

Take two tablespoons, or three, as appropriate, within 30 to 15 minutes before each meal (morning, noon and night). Should shake the liquid before using and keep it in the dark, or in the refrigerator, if you heat.

If during treatment ( preventive or not) a bit unusual situations arise , such as vomiting , diarrhoea, rash , abscesses (in this case put aloe gel on the abscess) , dark urine seems that has blood , or other symptoms , this should not be cause for concern , but instead of satisfaction, it is the body to eliminate the bad toxins. It is not appropriate at this stage to stop treatment.

Honey has the ability to move in all parts of the body and is the vehicle that carries Aloe Arborescens to the far corners.

Simultaneously, tones the body with Fructose, Glucose, Sucrose, Maltose.

This distillate allows dilate blood vessels - especially older people - and helps the action of Aloe Arborescens and Honey. It also has a preservative function.
